

QA (Trainee) Test Assignment

1. Testing Checklist for the Widget

Header:

1. Verify if the logo/icon and text are clickable links; if so, ensure the links work correctly.
2. Verify the correctness of the displayed text.

Page Body:

Button “EN” (Language Selection):

1. Check if the page language changes properly when switching between “UA”, “RU”, and “EN”.
2. Verify that the button has a green outline when hovered.
3. Check if the button highlights in light blue on hover.

Main Menu:

1. Verify that the menu titles change correctly when switching languages.

Button “Select a Service”:

1. Verify that the button is outlined in green when hovered.
2. Check if the list of services opens upon clicking.

Inside the Service Dropdown:

1. Verify that the internal menu title is correctly translated across all languages.
2. Check if the search field returns relevant services when typing.
3. Verify that the search field is outlined in green on hover.
4. Ensure vertical scrolling works properly.
5. Verify that service items highlight in light blue when hovered.
6. Check that service items are outlined in green when hovered.
7. Test the functionality of the expand button “>”.

Inside Service Details:

1. Verify checkboxes appear turquoise and selected options are highlighted in blue.
2. Test navigation buttons “Back”, “Next”, and the arrow “<” near the “Select Service” title.
3. Check that the “Back” button has a blue outline by default and orange on hover or click.

Button “Select a Master”:

1. Check if the button is outlined in green when hovered.
2. Verify that a list of masters appears when clicked.

Inside the Master Dropdown:

1. Verify that the internal menu title is correctly translated.

2. Check if the search field finds relevant masters.
 3. Verify green outline on hover in the search field.
 4. Ensure vertical scrolling works correctly.
 5. Check if masters' list items highlight in light blue when hovered.
 6. Verify green outline on hover in the list.
 7. Confirm that clicking a master opens their profile.
Note: The master profile should open only after selecting a service. Use the "Back" or "<" buttons to return.
-

Booking Process

1. Select a service and click "Next".
2. Verify that selected services appear in a row and highlight in different colors (lime, turquoise, pink, purple, neon green, orange, blue, lavender, coral, light green, yellow, peach).
3. Check that services are removed by clicking the "X" icon.
4. Choose a master offering the selected service.

Master Profile:

1. Verify that the profile highlights blue and is outlined in green when hovered.
2. Check that the (i) icon button opens the master's profile.
3. Verify that clicking on the master's name also opens their profile.
4. Test navigation buttons "Back" and "<" near the master's name.

Button "Another Date" in Master Profile:

1. Verify text correctness and translation in all languages.
2. Check if color highlighting of services matches previous pages.
3. Verify that services can be removed via the "X" icon.
4. Test vertical scrolling.

Calendar:

1. Check vertical scrolling functionality.
2. Verify month navigation using arrows "<" and ">".

3. Test date selection.

Available Hours Window:

1. Verify vertical scrolling of available hours.
2. Check time slot selection functionality.
3. Ensure clicked time slots turn turquoise.
4. Test navigation buttons “Back”, “Next Service”, and “<” near “Selected Services Settings”.

Button “Next Service” (Form Page):

1. Verify text accuracy and correct translation.
2. Check vertical scrolling of the form window.
3. Ensure all input fields have green outlines on hover and highlight when active.
4. Confirm required fields (“Name”, “Phone Number”) have red asterisks (*).
5. If left empty, display message: “This field is required.”
6. Check that the “Next/Book” button is inactive until required fields are filled.
7. Verify placeholder text in each field.
8. Confirm autofill suggestions appear when clicking in input fields.
9. Check that suggestion rows highlight gray on hover, and selected values fill fields in light green.
10. Validate minimum input length: “Field length must be at least 2 characters.”
11. Verify that changing the country updates the phone code.
12. Check scrolling and highlighting in the country list.
13. Confirm comment field is resizable.
14. Verify that the “User Agreement” link opens in a new tab.
15. Check the correctness of “Booking Details” information.

16. Ensure details show salon address, service, master name, tip, total cost, and removable red X icon.
 17. Test horizontal scrolling of booking details.
 18. Verify navigation buttons: “Book”, “Back”, and “<”.
 19. Check if an SMS confirmation is received after booking.
-

Button “Book” (After Click):

1. Verify correctness of all page text.
 2. Check scrolling within the receipt window.
 3. Confirm that the “Book Again” link redirects to the booking page.
 4. Verify functionality of app logo links.
-

Footer:

1. Verify that the salon website link opens correctly.
This is my first written QA checklist.
-

2. Test Case for the Widget

See attached screenshot — *TestCase_TestAssignment_Pavuk.V.*

3. Bug List (from provided image)

See screenshots — *Jira_TestAssignment1_Pavuk.V.* and *Jira_TestAssignment2_Pavuk.V.*

4. Bug Report (Calculator Website)

Found Bugs:

1. Site name is missing in the browser tab.
2. Incorrect hyperlink format in address bar (http// instead of https://).

3. Typo in word “Wellcome” — should be “Welcome”.
 4. Calculator image failed to load (broken icon displayed).
 5. Missing buttons: “0”, multiplication (“*”), decimal separator, and reset/clear.
 6. Uneven spacing between button columns (1,4,7 vs. 2,5,8).
 7. Duplicate questions appear in the pop-up window.
 8. Browser tab cannot be opened in TestRail.
